Challenge

Spare Time Teaching

January 28, 2014

You may not add parameters or change the output.

Introduction

There has been a discussion about the output format of a cross product function (which was the first challenge), so lets turn it all the way up to 11!

Problem

Write a cross product function in less then 75 characters.

Example

```
> (ch '(1 2 3) '(a b c))
((1 . a) (1 . b) (1 . c) (2 . a) (2 . b) (2 . c)
 (3 . a) (3 . b) (3 . c))
```
